

Product Overview:

The EH-08/15/25 horizontal discharge, elevating prefeeder is designed to handle medium-sized parts. Using a modular, plastic, cleated chain to vertically and horizontally transport parts, this prefeeder allows the discharge to be closer to the bowl, eliminating potential scuffing or scraping of parts while being able to reach over existing equipment. A heavy duty variable speed motor helps to ensure proper product metering. Note: Controllers and mechanical level sensors are not supplied with this unit.
